

MEMSIC, INC.

800 Turnpike Street, Suite 202
North Andover, MA 01845
Tel: (978)738-0900

Founded in 1999, MEMSIC, INC. is a dynamic, highly profitable and fast growing pre-IPO semiconductor company that is focusing on MEMS product. MEMSIC is headquartered in Boston area and has a wholly owned large manufacturing facility and engineering center in Wuxi China as well as IC design centers in both Chicago and Boston.

The company currently is at a fast growing stage and is investing heavily in product R&D to expand its product lines into multiple technologies and market segments. We are looking for senior and talented engineers to join our friendly and dynamic team in both Boston and Wuxi to develop the world's most advanced technologies and products. We offer a US competitive compensation package for positions in both the US and China. All positions require strong team leadership, creativity and innovation. Current open positions are:

Sr. Leader in Process Engineering

PhD in Physics or EE with 10+ years of experiences in semiconductor process development and product. Position open in Wuxi, China.

Sr. Leader in Packaging Engineering

Ph.D. in physics or Material Sciences with 10+ year experience in micro-packaging and flip chip development and engineering. Position open in Wuxi, China.

VP Engineering

Ph.D. in physics or EE with 10+ year experience in product development in IC industry. Highly innovative and product oriented with in-depth skills and knowledge in IC processing, IC packaging, system design, and product engineering. Strong leadership and management skills as well as hands-on engineering ability. Position open in either Wuxi, China or Boston.
